Letter of Intent

Our company ILNET TRANSIT AS has a longstanding history. The main activities concern the sale of solid energy resources.

Since 2001 the company was actively engaged in exports of Russian energy coal to Western and Central European countries and also to Baltic States. Since the second half of the 2000s, our attention switched to a new direction – renewable energy sources, such as wood waste pellets, agricultural waste biomass and etc. Our company is one of the leading participants in the market increasing volumes every year. We are also a member of Argus, the leading independent international agency.

We have a wide network of partners from Russia and Europe and your platform based on blockchain technology can be of interest to us, since it can possibly optimize the procedure for mutual settlements and increase their security. ILNET TRANSIT AS is ready for a meeting to discuss the terms of cooperation.

Sincerely yours,
Juri Jelagin
Chairman of the Board
ILNET TRANSIT AS
