

TDS Resources OU  
Address: 5-7 Virbi tn,  
Tallinn, 13629, Estonia

KVANTER PLATFORM

#### LETTER OF INTENT

The main area of activity for TDS Resources is trading of ingredients for the production of mixed fodders. Almost all the biggest Russian oil extraction plants are our partners. We are quite a new company, but we have already achieved significant results with the help of active networking and our know-how in transport logistics of deliveries.

Our main customers are large European feed mills and also an extensive network of farms that consume our products. Therefore, we are interested in using new methods and systems of payment with counterparties. If your KVANTER platform allows it, we will be happy to meet with you and discuss possible ways of cooperation.

Sincerely yours,  
Igor Kuzmin  
Board member  
TDS Resources OU
